To Call Steeleville	Dial "849" plus the desired number
To Make All Other Out-of-Town Calls	Dial "OPERATOR" (zero) and give the name of the place you are calling. Give your number when requested.

Dial Telephone Information

HOW TO DIAL

The dial is the movable disc having ten circular openings. Each opening has a single numeral associated with it. To dial one of these single numerals, for example 6, place the finger in the circular opening having the numeral 6 associated with it and, with the finger in the opening, turn the dial around until the finger strikes the metal stop then remove the finger and allow the dial to turn back to its original position AT ITS OWN SPEED. (Helping or hindering the return of the dial may cause a wrong number to be reached.) If you do not know the telephone number, consult the telephone directory. To obtain new numbers not in this directory please refer to "TELEPHONE SERVICE CALLS" on outside front cover.

When you wish to dial a number lift your handset and listen for the "dial tone." This steady humming sound tells you that the dial equipment is ready for your call. Wait for this "dial tone" before starting to dial. If you start to dial before "dial tone" is heard, you will reach a wrong number or no number at all. When an exceedingly large number of our customers try to use their telephones at the same time, for example, when an emergency situation suddenly confronts an entire community, it should be expected that "dial tone" may not be heard instantly but that several seconds or more may elapse before this "start dialing" tone is heard. Upon hearing "dial tone," dial each digit of the number you wish to call in the manner explained above.

If the number you are calling is busy, a buzz-buzz sound will be heard and it is then necessary to replace your handset and dial the number again later. You will, of course, always receive a "busy tone" when you dial the regular telephone number of another party on your own party line. Please refer to "TO CALL ANOTHER PARTY ON YOUR LINE" hereinafter for more details.

SPECIAL INSTRUCTIONS TO PARTY LINE CUSTOMERS

Party line customers should listen for the dial tone before dialing and, if it is not heard, ask whether the line is in use. If you hear successive clicks when you are preparing to dial it indicates that another customer is using the line. Remember never to dial until you hear the dial tone.

TO CALL ANOTHER PARTY ON YOUR LINE AT PERCY

If you are using a party line telephone and try to dial the listed number of another party on the same line you will receive a busy signal.

To call another party on your line you must dial the SPECIAL CODE "19" plus the complete directory listed telephone number (all seven digits) of the party you are calling. After dialing "19" plus the telephone number you will receive a busy tone, hang up immediately to allow the called party's telephone to ring. After waiting a reasonable length of time to permit the called party to answer, pick up your receiver and begin talking. If the called party does not answer you may hang up and try again later.

When you are called by another party on your line, you will hear a rapid ticking sound for a few seconds. This ticking signal serves to inform you that the call is from another party on your line and that you should wait a moment if necessary, for the other party to return to the line.

The COMPLETE listings of ALL the parties on your line (their names and telephone numbers) may be obtained by dialing "OPERATOR" (zero) and asking for "Repair Service" during regular office hours (the Information Operator does not have records available to give you the names of the parties on your line). For your convenience, space has been provided at the bottom of this page for entering the names of other parties on your line and their telephone numbers.
